About Me

Dedicated & Reliable Full Stack Web Developer who is always motivated to contribute & seek knowledge from others. Forging & challenging myself in this field I have increased my productivity on daily basis. With help of my skills I can solve problems in an organized way & add more value to the company. Further I am also Motivated to learn & excel in your Company as a Web Developer.

Projects

1. IMDB Clone:

With help of HTML,CSS, JavaScript & TMDB's API I developed simple IMDB site which helps client to fetch movies rating from site.

2. To Do List:

Using Express Js framework , EJS handle bar I was able to build To Do List App which helps clients to plan & track their activities efficiently.

3. Text Convertor:

React Js helped me to built this site which can play around text & remove the minor defects or add value to the text.

4. News Insight:

Using React Js & API I was able to built short news insight where user can be able to read all sort of news from reliable sources.
